Dear Dr. Mason

Re: Japanese Patent Appln. No. 26463/78
(Our Ref: CH:RY, File: K-134-2)

1. Thank you for your letters of March 21 and 23, 1980.
2. In accordance with the instructions in your letter of March 21, 1980, we prepared an argument and filed it with the Patent Office on April 10, 1980.
3. We also incorporated an explanation about Herxheimer reaction described in materials provided with by Dr. Koba in the argument.
4. We presume that the Examiner will request animal experimental data on acute toxicity such as LD50 data by delivering the next official action.

Generally Japanese examiners are severe in requesting toxicity data.

In every event, please prepare LD50 data of the four imidazole derivatives used in this invention.

5. Please do not hesitate ask us, if you have any other questions.

Yours very truly,

R. Yoshioka

CH:RY:yn
